

# CAPELLA™

## *Elina* D+ Fetal Doppler

Elina D+ is a handheld instrument and it can meet the Foetal Heart Rate checking demand in a hospital, clinic or at home. It shows the digital values of the FHR display. It comes with a high precision aquatic probe and bright and clear monochrome LCD OLED display.

### **FEATURES**

- Bright LCD OLED Display.
- Optional temperature measurement and PC connectivity.
- Calculating FHR with the same DSP techniques used in Foetal Monitor to ensure accuracy and reliability.
- High sensitive transducer with low aquatic power, safer for the foetal.
- Friendly man-machine interface, easy to use.
- Built in inner speaker.
- Li ion battery and battery status indicator.
- Battery management function, auto power off if no signal detected after one minute.
